

COMP1044 – Work Breakdown Structure (WBS)

Internship Result Management System

Student Name	Youssef Walid Mahran	Student ID	20683692
Module	COMP1044 – Database and Interfaces	Submission	27 April 2026, 23:59
Technology	PHP, MySQL, HTML, CSS, JavaScript	GitHub Link	To be added by student

1. Project Modules

Module A – User Management: secure login/logout, role-based access control, assessor account management, and student profile CRUD.

Module B – Internship Management: assign students to assessors, store internship company details, and track internship status and academic year.

Module C – Result Entry and Mark Calculation: assessors enter scores for the eight fixed criteria, the system applies fixed weightages automatically, and comments are saved with each assessment.

Module D – Result Viewing: admins can view all results, assessors can view only their assigned students, and search/filter is available by student name and student ID.

2. Detailed Solo Work Breakdown

WBS ID	Task Description	Module	Est. Hours	Deliverable
1.1	Identify entities, attributes, and keys for the database design	DB	2h	ERD
1.2	Define relationships, cardinalities, and normalise the schema to 3NF	DB	2h	ERD / Schema
1.3	Draw the crow's foot ER diagram and export final PDF	DB	2h	COMP1044_ERD.pdf
1.4	Create MySQL tables with PKs, FKs, constraints, and seed data	DB	3h	COMP1044_database.sql
1.5	Create the weighted score view/query for final mark calculation	C	1h	SQL logic
2.1	Design the modern white UI layout, typography, spacing, and colour system	A-D	2h	style.css
2.2	Build the login page with client-side validation	A	1.5h	login.php
2.3	Develop the admin dashboard and navigation	A	1.5h	admin/dashboard.php
2.4	Implement student management page with add, edit, and delete actions	A	3h	admin/students.php
2.5	Implement assessor management page with CRUD actions	A	2.5h	admin/assessors.php
2.6	Implement internship assignment and management page	B	3h	admin/internships.php
2.7	Build assessor dashboard and my-students page	D	2h	assessor/*.php
2.8	Create assessment entry form with live weighted preview	C	3h	assessor/assess.php + js/app.js
2.9	Create admin and assessor result pages with detail view and search/filter	D	3h	results pages
3.1	Develop database connection helper and session/auth guard logic	A-D	2h	includes/*.php
3.2	Implement login/logout, password verification, and role-based redirects	A	2h	login.php / logout.php
3.3	Implement server-side validation and flash messages	A-D	1.5h	all PHP
4.1	Test all required features end-to-end and fix issues	A-D	3h	tested source
4.2	Prepare WBS document, source ZIP, and final submission folder	-	1.5h	final package
4.3	Record the 5-minute video demonstration separately before submission		2h	video.mp4

3. Individual Contribution Summary

All design, development, database implementation, interface creation, integration, testing, packaging, and documentation work for this submission were completed by **Youssef Walid Mahran (20683692)** as an individual project submission.

This includes the ERD, SQL schema and seed data, PHP backend, HTML/CSS/JavaScript front end, result calculation logic, and submission packaging.

4. Fixed Assessment Weightages

Assessment Criteria	Weightage
Undertaking Tasks / Projects	10%
Health and Safety Requirements at the Workplace	10%
Connectivity and Use of Theoretical Knowledge	10%
Presentation of the Report as a Written Document	15%
Clarity of Language and Illustration	10%
Lifelong Learning Activities	15%
Project Management	15%
Time Management	15%
TOTAL	100%

Declaration

I confirm that this WBS reflects my own individual contribution to the development tasks for the COMP1044 Internship Result Management System. AI usage, if any, should be declared separately through the required university AI use declaration process.
