

Work Breakdown Structure

Github link: <https://github.com/youssefmahrann/internship.git>

Task	Students name Youssef Walid Mahran (20683692)		
Front-End Development			
User Management	Designed the login page UI, admin dashboard cards, student forms, assessor forms, and consistent navigation for Admin and Assessor views.		
Internship Management	Built the internship pages layout, assignment form styling, company details form, and clean table views for internship records.		
Internship Result Entry and Mark Calculation	Created the assessment form interface for the 8 fixed criteria, live total display, comments area, and consistent validation messages.		
Result Viewing	Designed result list pages, mark breakdown screens, search boxes, and readable tables for Admin and Assessor result viewing.		
Back-End Development			
User Management	Implemented login/logout logic, session handling, role-based access control, and full student / assessor CRUD processing in PHP.		
Internship Management	Implemented database queries and PHP logic to assign students to assessors, save internship details, and update internship records.		
Internship Result Entry and Mark Calculation	Implemented score saving, validation, fixed weightage handling, final mark calculation, and assessment storage in MySQL.		
Result Viewing	Implemented database queries to fetch all results for Admin, assigned-student results for Assessor, and search/filter by student ID or name.
